CRYOGENICS—Lia Xue conducts research in medical technology under the supervision of Dr. J. Wosik. She earned her B.S. degree from Zehijian University and her M.S. from Sichuan University in China. She is pursuing a doctoral degree in electrical and computing engineering at the University of Houston.

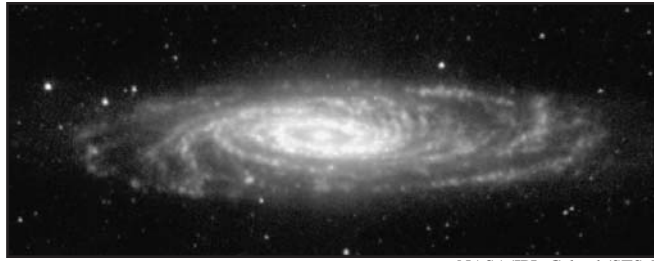

KAZAKHSTAN—From Kazakhstan, Tatyana Ivanova, studies torsion control systems at UHCL. Ms. Ivanova is associated with a research team headed by Dr. Thomas Harman. With degrees in mathematics, computer science, and physics, she is enrolled in the master's program in electrical and computing engineering. Researchers funded by federal and local agencies with support of UH and UHCL colleges train future scientists in state-of-the-art laboratories.
